What is the M4B Format?

A file with the M4B file extension is a MPEG-4 Audio Book file which are normally purchased from Apple's iTunes Store. And the audio in an M4B file is encoded with the AAC compression format and can, therefore, be protected with Apple's FairPlay DRM copy protection system in order to restrict access to only computers and iOS devices that have been authorized via iTunes.

Some people might be confused with M4B and M4A format. While the M4A audio format is basically identical to M4B except that those types of files are used for music instead of audiobooks.

Tips: Speaking of M4B format, you may only think of iTunes audiobooks, however, the decrypted Audible AAX books are also M4B books.
