# FAQ: Failed to convert Kindle books to EPUB

I downloaded my Kindle books via the Kindle for PC/Mac, but I got error information (Kindle KFX) and failed to convert the Kindle books. Why and how to resolve it?

Earlier in 2019, Amazon has released a new Kindle KFX DRM to protect Kindle books. Your Kindle eBooks will be encrypted with this new Kindle KFX DRM if you download Kindle eBooks via Kindle for PC/MAC version 1.25 or higher.

Now no tool can directly handle this new DRM scheme if the Kindle books are downloaded from v1.25/v1.26 Kindle desktop app. Therefore, the current solution to

this problem is to downgrade Kindle for PC/Mac to an older version.

Bonus Tip: Epubor Ultimate can detect whether your Kindle for PC/Mac is an older version. If it's not, it offers a way to automatically downgrade the Kindle app. Just click the link to start downgrading. After downgrading, please redownload the Kindle books with the older version of Kindle for PC/Mac. And lastly, don't forget to stop the auto-update of Kindle desktop by clicking "Tools">"Options">>"General">>uncheck the auto-update.
