Why should we convert RTF to EPUB? As we know, RTF file can not be read in most of the popular e-readers, such as kobo, nook, ipad, sony reader and so on. In contrast, EPUB is accepted by many digital devices because it is the accepted standard format for digital book publishing.

1. Calibre

As a free ebook conversion software, Calibre supports a large number of ebook formats. Input formats: EPUB, AZW, MOBI, LRF, ODT, PDF, CBZ, CBR, CBC, CHM, FB2, HTML, LIT, PRC, PDB, PML, RB, RTF, SNB, TCR, TXT. Step 1: Download and Install the Calibre

Calibre is compatible with Windows, Mac OS X and Linux platform. Choose the corresponding version and click on the download button. When you have finished the above process, please install it on your PC or MAC. Then double click desktop icon to open the Calibre.

Step 2: Add Books

Click on the "Add books" button at the upper left of the toolbar and you can choose the books you want to convert. When the book has been successfully added, it will be displayed in the middle list of your Calibre.

Step 3: Convert the Book

Click on the " Convert books" button, and you can choose to convert your books individually or in bulk. Then select the Output format "EPUB" for your book and click "ok". After the converting processing has been finished, you can see the converted book in the middle list of your Calibre, with the format "EPUB". Then click right mouse on the book and "Open Contain Folder" will pop up. Click it you can find your converted book.

Although, we have to install the Calibre before the converting, but the converting speed is faster than other online converters. That's why I recommend this tool to you in the first place.

2. Convert.file

Besides Ebooks, you can convert videos, audios, documents, drawings, presentations etc on [Convert.file](#). The whole process is online and you won't be asked to download anything. You can convert your file up to 250MB which can meet most of users' needs.

In fact, I hate to use this online converter in case the file size is more than 100MB. Why? Because the converting process would take about 2 to 3 minutes. It is a little bit waste of time. Also, there are a lot of advertisements on the webpage.

3. Convertio
