Default Method to Print VitalSource eBooks

VitalSource Bookshelf allows users to print the eBooks but it has print page limitations so you can only print a few pages one time. Let's see how we can print a VitalSource eBooks with the page limitations.
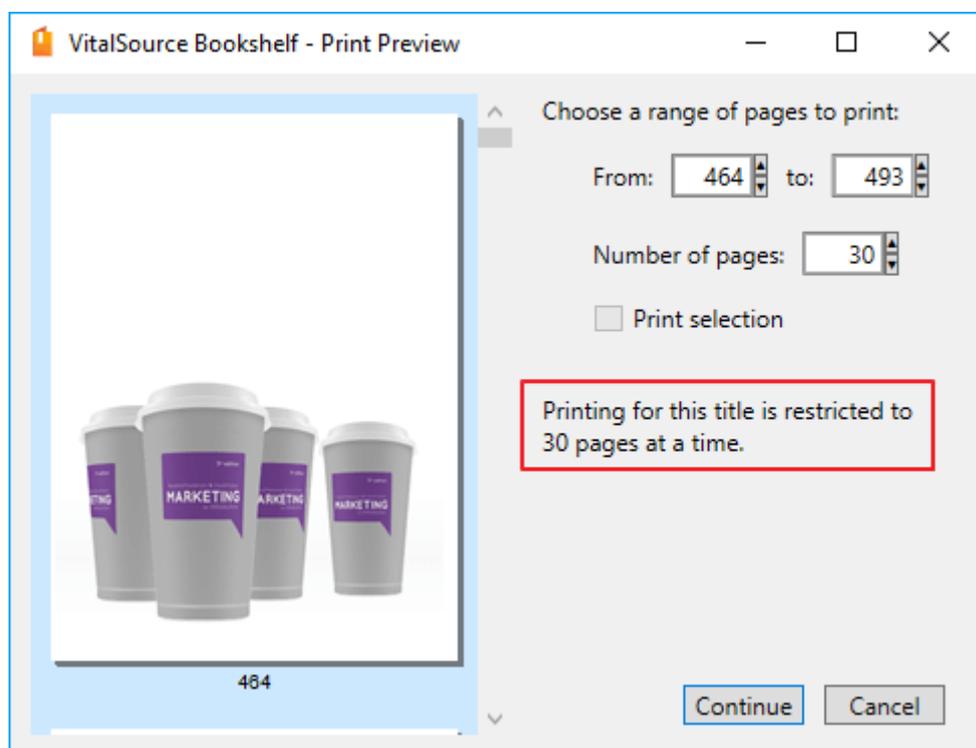

Step 1: Download VitalSource Bookshelf desktop application and install it on your computer.

Step 2: Click the Book cover and navigate to the first page of the book which you want to print.

Step 3: Click on *File* at the menu and select *Print* from the drop-down list.

Step 4: The print preview page will pop up. In this page, you can see that the printing for this title is restricted to 30 pages at a time. This is much more than my expectation. I even see that there is one page at a time.

Choose the range for your print and click on *Continue* button to print this book. Now you can print 30 pages at a time, but if you want to print this whole book, you need to repeat this whole process which is really annoying and time-consuming if your book contains thousands of pages. That's why I strongly recommend you to use the following method to print VitalSource eBooks.
