Why create PDF files?

There are 2 methods that we can use. We can both email the fils to Amazon and copy files to Kindle with USB. Here I think the latter is more easy to use.

1. Creating a PDF preserves the formatting and fonts of original documents.
2. Create PDF documents for professional printing.
3. Create PDF for easy reading on different operate OS, as ebook, it's supported on any eReader devices.

4. Creating PDF prevents your files from being copied or modified, protect your copyrights.
