There's no doubt that VitalSource, as the leading provider of online textbooks and course materials, is a good place for students, teachers, and researchers to shop for eTextbooks as it saves up to 80% of textbooks and gives users instant access to over a million online textbooks anytime, anywhere and on any device. However, the textbooks purchased from VitalSource website and downloaded via its Bookshelf application are saved in **vbk files** which are VitalSource proprietary files with DRM protection and only be read on its own VitalSource Bookshelf software.
